PROFESSIONAL SUMMARY

Microsoft Certified Power Platform Developer Associate (PL-400, October 2026) with hands-on experience building internal business applications, Dataverse solutions, Power Automate cloud flows, custom connectors, and Dynamics 365 Business Central integrations. Built 100+ Power Automate automations and 12 canvas and model-driven apps supporting operations, accounting, HR, field service, production, approvals, document generation, and ERP-connected processes. Combines technical build capability with an accounting and operations background to turn business requirements into maintainable solutions.

CERTIFICATIONS

- **Microsoft Certified: Power Platform Developer Associate (PL-400)** — Microsoft, October 2026
- Exam skills: Dataverse plug-ins and the event execution pipeline, custom APIs, Dataverse Web API and Organization Service, Azure Functions, custom connectors, cloud flows, Power Apps Component Framework (PCF), model-driven app client scripting, solution ALM, environment variables, and connection references.
- Intuit QuickBooks Certification — QuickBooks Level 2, payroll, and basic accounting.

TECHNICAL SKILLS

- **Power Platform:** Power Apps (canvas and model-driven), Power Automate (cloud flows), Dataverse, Power Fx, solutions, solution-aware flows, environment variables, connection references
- **Dynamics 365 and ERP:** Dynamics 365 Business Central, Business Central OData APIs, Dynamics 365 Sales Hub
- **Integration:** Custom connectors, REST APIs, Dataverse Web API, HTTP actions, JSON schemas, OData
- **Automation:** Approvals, scheduled flows, trigger conditions, scopes and error handling, Teams and Outlook notifications, document generation
- **Development:** C#, Dataverse plug-ins, JavaScript web resources, HTML, CSS, SQL, Python, Git, GitHub

SELECTED POWER PLATFORM PROJECTS

- **Business Central Custom Connector:** Built a reusable custom connector exposing Business Central OData actions for jobs, job tasks, planning lines, items, purchase orders, payroll data, PTO, reimbursements, production queue data, and invoices.
- **Sales Hub to Business Central Job Automation:** Automated the process from a won Opportunity to Business Central job creation, related customer and contact logic, SharePoint folders, Teams and Outlook notifications, and scope-based error handling.
- **Customer Contract PDF Generation:** Created a Sales Hub command bar action and JavaScript web resource that sends an Opportunity ID to Power Automate, populates Word templates, merges PDFs, and returns a downloadable contract package.
- **Canvas App Operations Tools:** Built employee-facing app features for receipt submission, vehicle inspections, production queue visibility, company announcements, and employee document access.

PROFESSIONAL EXPERIENCE

Business Solutions Associate | Wolf Industries Inc. | Battle Ground, WA | 2022-Present

- Develop Power Apps canvas apps, model-driven apps, Dataverse tables, and Power Automate cloud flows to replace manual business processes and improve operational visibility.
- Built and maintained 100+ Power Automate automations and 12 in-house Power Platform apps supporting accounting, HR, field service, production, sales, and asset management.
- Created a custom Business Central connector making ERP data reusable across Power Apps and Power Automate for jobs, job tasks, items, payroll, PTO, purchase orders, and production queue records.

- Designed cross-system automations connecting Microsoft Sales Hub, Dataverse, Business Central, SharePoint, Outlook, and Teams.
- Implemented approval workflows, scheduled notifications, document generation flows, trigger conditions, error handling scopes, and role-based user experiences.
- Gather requirements directly from stakeholders, test solutions, train users, and improve accounting and operations workflows.

Subcontract Accounting Specialist | Nutter Corporation | Vancouver, WA | 2020-2021

- Processed job-related vendor costs, subcontractor payments, payment disputes, and project cost routing using construction accounting workflows.
- Improved accounting procedures, verified data accuracy, managed digital files, and collaborated with project managers on workflow improvements.

Bookkeeper | NW Accounting Professionals | Battle Ground, WA | 2019-2020

- Processed 1099/1096 forms for 100+ clients, reconciled bank accounts, processed payroll, and prepared journal entries for CPA review.
- Managed payroll tax processes, EFTPS setup and payments, and quarterly excise and B&O tax reconciliation.

Accounting Clerk | Platinum Industrial Inc. | Woodland, WA | 2017-2019

- Processed multi-state, multi-union payroll, accounts receivable, progress billing, accounts payable, job setup, and forecasting spreadsheets.
- Maintained accurate project, tax, union, budget, revenue, and employee records across accounting systems and digital file structures.

EDUCATION

- The Tech Academy — Software Developer Boot Camp Graduate; full-stack training in HTML, CSS, JavaScript, SQL, Python, C#, and software development fundamentals.
- American Institute of Professional Bookkeepers coursework — journal entries, correction of accounting errors, inventory, and payroll.
